

MCT/MST Lesson Observation

Feedback to student teacher

Student teacher's name: Hala

Observer's name: Ebtesam Alzahmi

Unit/Lesson: Science

Grade Level: Three

Date: October 24, 2017

Competency Area	F	D	C	B	A
Commitment to the Profession					😊
Planning for learning					😊
Managing Learning				😊	
Implementing Learning			😊	😊	
Assessment					😊
Reflection on Practice				😊	

Strengths of the lesson:

Good transition strategy, calling group by group to set on the carpet.

Good start to the lesson by reviewing previous lesson and then talk about today's lesson.

You managed to ask some good questions about the difference between the soil in the UAE and other European countries.

Good that you revised the new words before explaining the concept.

Good and clear explanation of the soil layers.

Very good strategy when you asked students to use the new words and put them against the picture it refers to.

Good use of classroom management and positive reinforcement.

You managed to implement differentiation very well in your class, based on your students' level.

The closing activity was very interactive and authentic, students seemed to learn most of it as it relate to reality and everyday life.

Areas for development:

Before explaining the activities make sure you get students attention.

A = Exceptional, B = Very Good, c = Satisfactory, D = Marginal and F = Unsatisfactory
